

Street Outreach Services Include:

- Making contacts and developing relationships with people who are unhoused, residing in places not suitable for human habitation such as streets, cars, tents, and abandoned buildings
- Connection to basic needs, emergency shelters, and other community resources
- Connection to services such as medical, mental health, and AODA treatment, employment, and long-term supportive services
- Connection to housing
- Coordinated Entry is the system for connecting people experiencing a housing crisis to the appropriate services. This may include the VI-SPDAT assessment and referral to The Housing Priority List. Outreach staff may serve as *Coordinated Entry mobile hubs*.

When to use this list:

This list is intended for situations where a person notices someone is sleeping in a place not meant for human habitation and wants to ensure they are connected to services. This list will help assist in making the appropriate referral.

Please note that this list is NOT intended to help in emergency situations.

After making referral:

You may not get a call back when you make the referral. Please trust that the outreach provider got the message and is acting on it.
